We are now stocking GI Industries Portable Tube Cleaning Machines, Flexible Shafts and brushes. GI Industries has a long tradition of developing the next generation of high-quality industrial maintenance equipment.

GI Industries FS-series flexible shafts are made for heavy use in the commercial environment. They are designed with aluminum manifolds for extra strength, bright orange color for safety, universal connections, welded hardened steel cable and are field repairable.

GI Industries brushes are highly effective in cleaning light, medium and heavy deposits. These brushes are aggressive and will not damage tubes.

If you're looking for an upgrade to your Goodway shafts and brushes, GI Industries parts will work on your Goodway machine.

Nu-Calgon

Don't Miss all of the Opportunities available with Nu-Calgon Glycol Products!
